

UNBC's Quesnel River Research Centre at Likely will be hosting an Open House on **Saturday 29th September 2018.**

The event will include presentations by key researchers from UNBC, UBC, the University of Lethbridge, and the Department of Fisheries and Oceans, who have been investigating the environmental impacts of the Mount Polley mine tailings released into Quesnel Lake in 2014, and an extended Q&A session.

Talks will begin at 10 am, and will be followed by lunch. Location details available at [unbc.ca/qrrc](http://unbc.ca/qrrc).
